Dear Sue,

POSSUM CONTROL

As you are aware, KB Environmental Services has been contracted by TBfree New Zealand Limited to undertake pest control work for possums in the Ruapehu District. The work undertaken is to reduce bovine Tb vectors in this area.

The operation (see attached map) is known as:

- Owhango GS2

Control methods scheduled for use on this land consist of Pestoff (Brodifacoum) and Feratox (Cyanide) in bait stations, Feratox (Cyanide) in bait bags and trapping.

Commencement of treatment has started and we now expect to have the work completed by 31 August 2017.

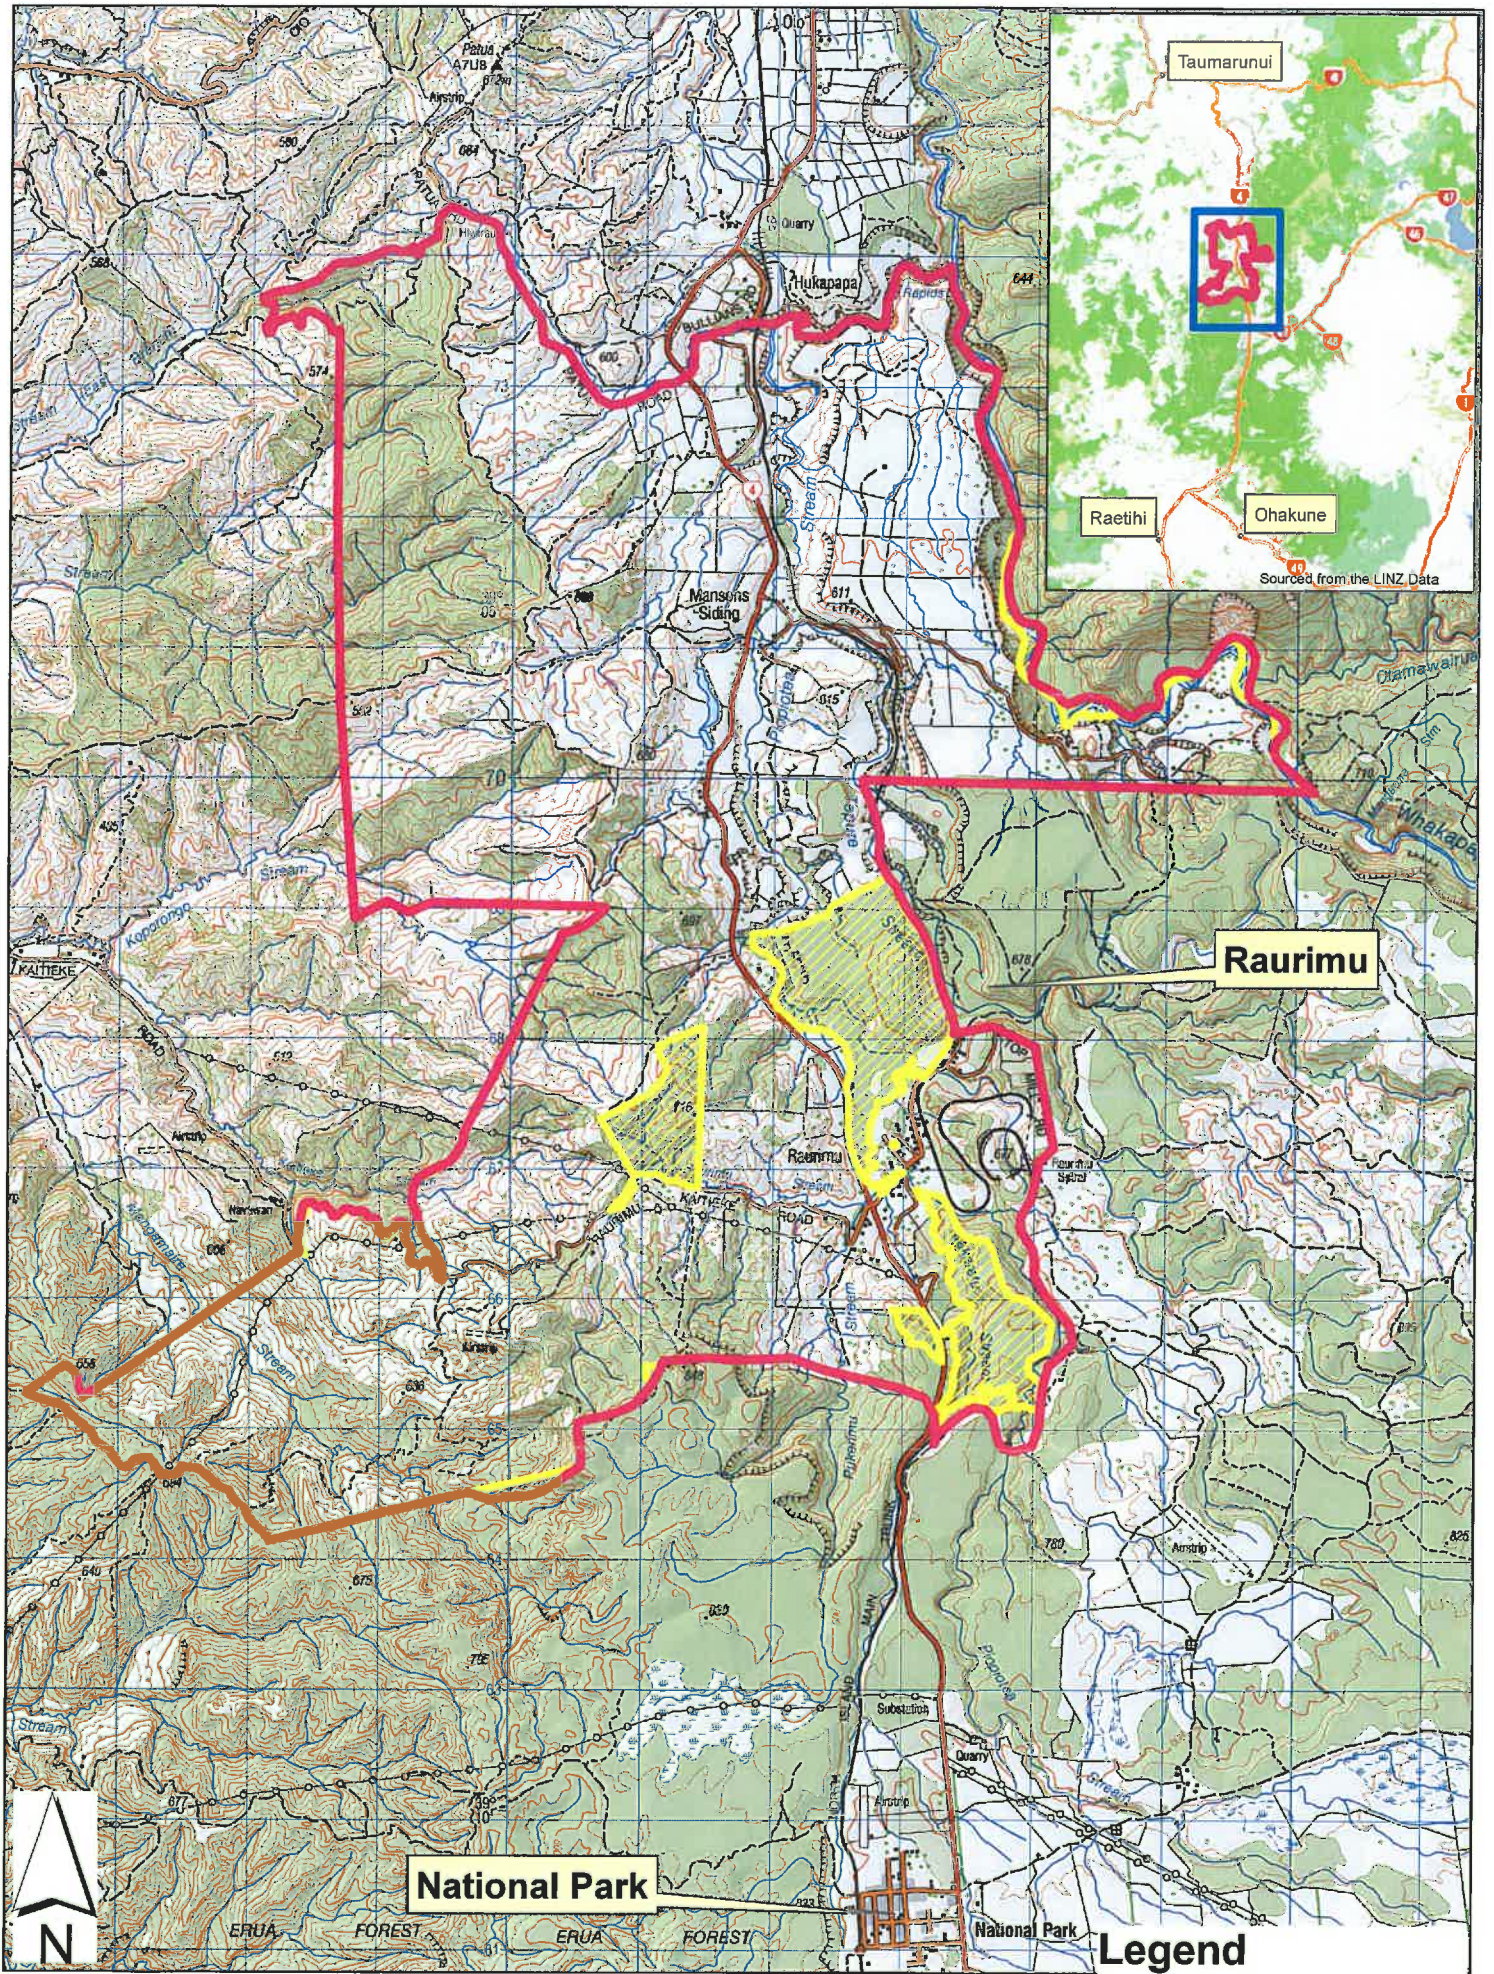

The work will be carried out in accordance with all relevant legislation with appropriate consent/approvals obtained.

Should you require any further information or wish to discuss this Operation further, please contact our office in Wanganui on 06 343 8100, or myself on 274 535 114.

Yours sincerely

Kevin Battersby
MANAGING DIRECTOR
