

21 June 2017

Sue Van der Bersselaar NZ Deerstalkers Association Head Office P O Box 6514 Marion Square Wellington 6141

Dear Sue.

## POSSUM CONTROL

As you are aware, KB Environmental Services has been contracted by TBfree New Zealand Limited to undertake pest control work for possums in the Rangitikei District. The work undertaken is to reduce bovine Tb vectors in this area.

The operation (see attached map) is known as:

Hihitahi (Exclusion, GS2A and GS2B) 2016-17

Control methods scheduled for use on this land consist of Feratox (Cyanide) and Pestoff (Brodifacoum) in bait stations, Feratox (Cyanide) in bait bags and trapping.

The possum control has been completed on Hihitahi GS2A and Hihitahi Exclusion.

We are currently carrying out the possum control on the Hihitahi GS2B area and now expect to have the work completed by 31 August 2017.

The work will be carried out in accordance with all relevant legislation with appropriate consent/approvals obtained.

Should you require any further information or wish to discuss any of these Operations further, please contact: Our office in Wanganui 06 343 8100

Kevin Battersby

0274 535 114 (Managing Director)

Yours sincerely

Kevin Battersby

**MANAGING DIRECTOR**
